

## Course: 104 : Computer Programming & Programming Methodology

Course Code	104
Course Title	Computer Programming & Programming Methodology
Credit	4
Teaching per Week	4 Hrs
Minimum weeks per Semester	15 (Including class work, examination, preparation etc.)
Review / Revision	June 2014
Purpose of Course	Computer programming (often shortened to programming) is a process that leads from an original formulation of a computing problem to executable computer programs. Programming involves activities such as analysis, developing understanding, generating algorithms, verification of requirements of algorithms including their correctness, and implementation (commonly referred to as coding) of algorithms in a target programming language.
Course Objective	Introduce students the rudiments of computer programming and programming methodology using C language.
Pre-requisite	None
Course outcome	The students will be able to form an original formulation of a computing problem to executable computer program using C.
Course Content	<p><b>Unit 1. Algorithm and Flowchart</b></p> <p><b>Unit 2. Programming Languages &amp; Structured Programming</b></p> <p>2.1. Structured Programming</p> <p>2.2. Concepts of Compiler / Interpreter Editor</p> <p><b>Unit 3. Constant &amp; Variables , Data Types</b></p> <p>3.1. Character Set</p> <p>3.2. Identifiers, Key words, Data types</p> <p>3.3. Constants- needs &amp; Definition</p> <p>3.4. Variables- needs &amp; Definition</p> <p>3.5. Storage Classes</p> <p><b>Unit 4. Expression &amp; Operators</b></p> <p>4.1. Operators</p> <p>4.1.1. Arithmetic Operators</p> <p>4.1.2. Unary Operators</p> <p>4.1.3. Relational Operators</p> <p>4.1.4. Logical Operators</p> <p>4.1.5. Assignment Operators</p> <p>4.1.6. Conditional Operator</p> <p>4.2. Expression</p> <p>4.2.1. Arithmetic expression</p> <p>4.2.2. Boolean expression</p> <p>4.3. Evaluation &amp; Assignment of Expression</p> <p><b>Unit 5. Input &amp; Output Statements</b></p> <p>5.1. Formatted I/O statements (like scanf, printf)</p> <p>5.2. Unformatted I/O statements (like <i>getchar()</i>, <i>getch()</i>, <i>getche()</i>, <i>putchar()</i> )</p>

	<p><b>Unit 6. Control Statements</b></p> <p>6.1. <i>if</i> statement</p> <p>6.1.1. Simple <i>if</i> statement</p> <p>6.1.2. <i>if...else</i> statement</p> <p>6.1.3. Nested <i>if</i> statement</p> <p>6.2. <i>while</i> loop</p> <p>6.3. <i>do...while</i> loop</p> <p>6.4. <i>for</i> loop</p> <p>6.5. <i>break and continue</i> statements</p> <p>6.6. <i>switch</i> statement</p> <p><b>Unit 7. Arrays</b></p> <p>7.1. One Dimensional Arrays</p> <p>7.2. Sorting using One Dimensional Arrays</p> <p>7.3. Concept of Two Dimensional Arrays.</p> <p>7.4. String- Array of characters</p> <p>7.5. String Manipulation</p> <p><b>Unit 8. Built-in Functions</b></p> <p>8.1. Mathematical Functions</p> <p>8.2. String Functions</p> <p>8.3. Conversion Functions.</p> <p><b>Unit 9. Debugging and Testing</b></p>

Teaching Methodology	Class Work, Discussion, Self Study, Seminars and/or Assignments
Evaluation Method	30% Internal assessment. 70% External assessment.
